Technical Data Sheet

CA-200 MATTING AGENT

CA-200 Matting Agent is a 100% non settling additive for matting the lacquer. CA-200 Matting Agent is a Nano dispersed silica, established as the leading non settling gloss reducing additive in the specialist electrophoretic coating market. Its ease of use into coating baths , makes it an ideal choice for the production of a stunning array of finishes

PROCEDURE

1. CA-200 Matting Agent can be added from 50 – 200 gms depending upon the desired finish.
2. Always make sure to take equal amount of DI water and CA-200 Matting Agent, mix well before adding it to the main tank

BENEFITS & ADVANTAGES

1. Extremely easy to incorporate into working baths with no special pre mixing required
2. Completely non-settling
3. Highly effective with the correct choice of coating
4. Non hazardous water based composition
5. Improves scratch / mar resistance
6. Provides silk like effects
7. Exceptional long term bath stability
8. 100% material utilization no waste.
